

Available – Summer 2010

Now Shipping from Special Projects Audio

The EVO True Wireless system's Patented design completely reinvents wireless for fitness. No wires, no bodypack. Take a quick look at these features found on no other system

- 1 Water resistant construction designed specifically for fitness and demanding environments - you will not sweat this system out
- 2 Built in recharging system eliminates ongoing battery expense and waste
- 3 Ultra-miniature transmitter rests comfortably behind the ear, not hanging off the back of the head
- 4 Streamlined, lightweight and super-thin design (transmitter is less than 1/2 an inch thick) stays put, and stays comfortable
- 5 Easy to setup 16 FCC-safe frequencies with AutoScan channel selector on the Scan16 receiver - Spread over 3 TV channels to work in any market
- 6 To top it off, we are sure you'll think this is the best sounding headset system you've ever used!

Don't forget - the FCC ordered that all 700 MHz (698 - 806 MHz) systems must have ceased operation no later than June 12, 2010. Are your customers using a banned system? Get them into an EVO - there is nothing else like it!

SP-EVO

***Price: \$419. + applicable taxes**

Are you already using a Scan16 bodypack system? Upgrade to the EVO! The headset transmitter is available by itself, and will work with your Ansr Audio AW-25 receiver. Order part number SP-EVO.

SP-EVO-25

***Price: \$649. + applicable taxes**

Complete EVO True Wireless system - head worn transmitter and AW-25 Scan16 receiver. Connects to your sound system with 1/4 inch and XLR outputs. Includes rack mounting hardware. Order part number SP-EVO25.

SP-GXE-LITE

***Price: \$999. + applicable taxes**

40 Watts, only 4.8 pounds! The Group.X EVO Lite uses lightweight, recharging lithium batteries to deliver hours of use in an ideal system for smaller classes. Built in receiver, includes handy carry case and shoulder strap. Order part number **SP-GXE-LITE**.

SP-GXE

***Price: \$2199 + applicable taxes**

120 Watts to cover any class. Integrated wheels and retractable handle make it a breeze to move. EVO transmitter and built in receiver, CD player and Aux (MP3) inputs make this the ultimate fitness portable. Order part number **SP-GXE**
