

THE EVO TRUE WIRELESS SYSTEM

Group.X Evo and Group.X Evo Lite Combine True Wireless with True Portability

The Evo True Wireless System's Patent Pending design frees you from the bodypack by miniaturizing the transmitter and integrating it with the headset to deliver the only recharging, waterproof, heavy duty true wireless system available. Now, in addition to the standard system featuring the Scan16 AutoScan receiver, the Evo is available in two ready-to-go packages, perfect for group classes of all sizes.

The Group.X Evo delivers more power than any other portable in the category, making it ideal for even the largest group activities. Fiber reinforced high-impact lightweight case, retractable carry handle and built-in wheels make the Group.X Evo a breeze to move between classes. Anti-shock CD with pitch control, USB and line MP3 player inputs, and wired mic input for added versatility.

Dual heavy-duty recharging batteries make the Group.X Evo truly portable.

For the ultimate in portability, the recharging Group.X Evo Lite weighs in at just 4.8 pounds - that's with the batteries included. Ideal for the instructor on the go or for smaller classes. Simply stow the Group.X Evo Lite in it's case and throw it over your shoulder.

Group.X Evo

Evo True Wireless Headworn System
