Description: All previous Aqua Anatomy workshops are available for independent study. The muscles featured in session #12 are the main muscles of the Neck. This interactive, hands-on approach to applied anatomy is guaranteed to inspire curiosity about how to condition the muscles associated with the neck in the aquatic environment.

Learning Objectives:

- 1) Become familiar with the main muscles associated with the Neck: names, location and joint actions, in their role as prime movers.
- 2) Learn specific CALA Base Movement sequences that activate the main muscles of the Neck with particular attention to head positioning.
- 3) Practice stretching to elongate the muscles of the neck in both chest-deep and deep water.
- 4) Adapt exercises and stretches to accommodate participants with common conditions.
